Create a 12x12 album page quickly from this layered file. Separate layers allow for easy color customizing that coordinates with your photo. This template was created using brushes included on this DVD.

Brushes include CS2 ABR file as well as individual PNGs, to make brushes in older versions. Template is a layered TIF file (compatible with Photoshop v.7 and higher).

SAMPLE IDEAS using products on this DVD

* Dynamic Brush Presets control various aspects of the brush to create random textures. These presets will not "stamp" single images. A pen or mouse must be moved to achieve desired patterns. A pen tends to allow more control, but a mouse will also create textures.
